To Whom it May Concern:

I am pleased to recommend Power Lift Foundation as a sub-contractor. We hired Power Lift Foundation for the renovation of a 1930's School Building in which we acted as Construction Manager. The Scope of work for this project consisted of replacing joists, Drilling Helical Piers, and adding steel I-Beam girders throughout the 12,000 sq. ft. building. This project was quite complex, especially from a scheduling perspective as the renovation was done during the summer in order to have the school ready before fall classes began.

I would, without hesitation, recommend Power Lift Foundation and look forward to working with them in the future. Feel free to contact me to discuss this reference.

Best Regard,

Eric Berry
