**RE: Engineer's Letter of Recommendation**

To Whom It May Concern:

As a structural engineering firm Westbrook Engineering, LLC has had the pleasure of working with Power Lift Foundation Repair for approximately the past fifteen years. They have been awarded many of the projects of which we provided the necessary plans and specifications. We have also assisted Power Lift in projects that originated through their clients.

However we have always found Power Lift Foundation Repair to have many strong points that not always common to many of the other smaller or larger companies. Among the strong points we have found the following:

- ✓ Quickly responsive to project concerns
- ✓ Qualifications built on years of experience
- ✓ Large enough to have the necessary equipment and personnel
- ✓ Always working toward improving skills and equipment
- ✓ Competitive pricing
- ✓ Professional attitude to project (details, communication and appearance)

We continue to work with Power Lift Foundation repair on a frequent basis and anticipate working with them for many years to come.

We would strongly recommend this company be given serious consideration for project(s) within their specialty.

Please contact this office if there are further comments or questions regarding this company that we may address.

Respectfully,  
*Westbrook Engineering*

James E. Westbrook, P.E.
